

**Dear Parents and Guardians:**

The Healthy Schools Act of 2000 requires that all California school districts provide annual written notification to students' parents/guardians regarding expected pesticide use on school sites during the school year. The notification must identify the active ingredient or ingredients in each pesticide product. The following is a list of pesticides that CreArt may use at its school sites this year:

**Clorox Regular Bleach – EPA Register Number:5813-111**

**Active Ingredient: Sodium Hypochlorite 6.0%; other Ingredients: 94.0%; Yields 5.7% available Chlorine**

**Bleach is used daily in a diluted form - Water Bleach Solution ½ cup/gallon water**

CreArt Early Education & Preschool will provide written notification to all parents / guardians regarding individual pesticide applications at school site at least 72 hours before the pesticides are applied. Please watch for the notification/s your student will bring home during the course of the school year (if any applications are scheduled).

You can find more information regarding the above pesticides and their alternatives at the Department of Pesticide Regulation's Website: <http://www.cdpr.ca.gov>. If you have any questions, please contact Patricia Van Der Beek Program Director of CreArt at (415) 444-0600.

**Request for Individual Pesticide Application Notification**

I understand that, upon request, CreArt is required to supply information about individual pesticide applications at least 72 hours before application. I would like to be notified before each pesticide application at this school.

I would prefer to be contacted by  E-mail  Text Message  Phone Call
